CAREER SUMMARY

Unity Game Developer with 5+ years of professional experience creating core gameplay systems and modular C# architecture. Proven track record of commercial impact, translating complex designs into resilient game systems and modular architecture for millions of active players. Versatile engineer skilled in UI/UX, gameplay loops, multiplayer networking concepts, and cross-platform optimization, with a strong focus on player experience and mechanical polish. A collaborative, self directed professional who thrives in agile teams.

WORK EXPERIENCE

LIV

Staff Unity XR Engineer / Streaming Product Lead | October 2023 – April 2026

- Founding member on the release of the SDK, 'LIV Creator Kit' (LCK). The camera system implemented in over 300+ successful games, including current most played VR game 'Gorilla Tag'. Supporting 1.4+ million monthly active users with over 124+ million videos recorded.
- Continued updating LCK and 'Gorilla Tag' with new features. I was the product lead on our livestreaming updates which involved maintaining multiple camera prefabs with state machine architecture for the UI notification system and setup flow. Created the UI/UX for Photo Mode which has been used for over 15+ million photos taken.
- Developed all UI/UX menus for 'Project Spatial', a 3D volumetric video capture app as a research and development project, released on Steam and Meta store.

Future We Want

Unity Game Developer | June 2022 – September 2023

- Brought the 2D educational game demo 'How Bad Are Bananas' to life. Worked on all the UI for menus, level select, gameplay loop and puzzle system. Received high praise in playtests from big corporate clients such as Lloyds bank and at in-person events such as Innovation Zero.

Twisted BrainZ

Unity C# Programming Internship | April 2021 – October 2021

- Worked on the UI/UX for the RPG style crafting system and created the keyboard/controller hotkey rebind system found in the upcoming steam game 'Rise of Peles'.

EDUCATION

Anglia Ruskin University, Cambridge | 2015 – 2018

BSc Computer Gaming Technology (Hons) | Graduated with First Class Honours

SKILLS

- **Languages & Engines:** Expert C# & Unity (SOLID, OOP), Basic C++ & Unreal Engine/Blueprints.
- **UI/UX & Tools:** Figma to Unity implementation, Blender (3D Modelling/Rigging), Leveraging AI/ML for code.
- **Workflow:** Git, Perforce, Plastic SCM/Unity Version Control, Jira, Agile, UML Diagrams.
- **Languages & Misc:** English (Native), French (Working), Full Driving License.

EXTRA EXPERIENCE

Competitive Esports Player | 2012 – 2020

- Represented Team UK at WESG 2017 and achieved a Top 50 solo leaderboard ranking in Dota 2. Learned valuable collaboration skills, giving and receiving constructive criticism, leading a team and livestreaming.

Personal Game Development Projects | 2015 – Present

- Continuously prototyping mechanics and technical systems in Unity, currently expanding into multiplayer networking architectures learning Netcode for GameObjects.
